

# KETAN SHARMA

Senior Platform Engineer | AWS | Kubernetes | SRE | Cloud & AI Platform Engineering

[ketansharma040293@gmail.com](mailto:ketansharma040293@gmail.com) • +91-8267896988 • [LinkedIn](#) • [Portfolio](#)

## Professional Summary

Senior Platform Engineer with 10+ years of experience designing, building, and operating enterprise AWS and Kubernetes platforms at scale. Experienced in multi-region EKS, Infrastructure as Code, GitOps, CI/CD, SRE, observability, and cloud architecture supporting 100+ applications. Strong track record of improving platform reliability, deployment velocity, incident response, security, and operational efficiency. Experienced in AI-assisted platform engineering, including building Kubernetes operations and knowledge-retrieval solutions for engineering teams.

## Skills

- **Containers & Kubernetes:** Kubernetes, Amazon EKS, Docker, Helm, RBAC, Ingress, HPA, VPA, Cluster Autoscaler, Karpenter, cert-manager, external-dns, metrics-server, Gatekeeper, CSI drivers
- **CI/CD & GitOps:** Git, GitLab CI, GitHub Actions, Jenkins, Concourse CI, AWS CodePipeline, Argo CD, GitOps, release automation, deployment and rollback strategies
- **Programming & Automation:** Python, Bash, Linux, REST APIs, automation scripting, system troubleshooting
- **Cloud & AWS:** EC2, ECS, ECR, S3, RDS, DynamoDB, Lambda, IAM, Route 53, Glue, Athena, Step Functions
- **Infrastructure as Code:** Terraform, CloudFormation, reusable modules, infra provisioning, config management
- **SRE & Observability:** SLI/SLO/SLA, incident management, RCA, Datadog, Prometheus, Grafana, CloudWatch, Loki
- **AI & Developer Tooling:** FastAPI, LangChain, RAG, Azure OpenAI, AWS Bedrock, OpenAI Codex, Claude Code
- **Networking & Security:** Subnets, routing, NAT, DNS, TLS/SSL, WAF, security groups, Kubernetes RBAC, Trivy, Tenable, Cloudflare WAF, Cloudflare Tunnels

## Experience

Senior Platform Engineer, *Boston Scientific* (08/2024 – Present)

- **Engineered and operated** a global AWS developer platform spanning **15+ Amazon EKS clusters and 100+ applications** across multiple AWS regions, standardizing application onboarding, deployment, lifecycle management, and reliability.
- **Automated AWS infrastructure and Kubernetes cluster provisioning and lifecycle management** using **Terraform, GitLab CI, and Argo CD**, establishing repeatable **Infrastructure-as-Code and GitOps workflows** and reducing manual operational effort by **60%**.
- **Designed and implemented CI/CD pipelines** for Docker image and Helm chart builds, **Trivy container image scanning**, EKS maintenance, and infrastructure validation, increasing deployment frequency by **40%**, reducing lead time from **45 to 15 minutes**, and lowering change failure rate by **20%**.
- **Improved platform reliability and incident response** through Python automation, Datadog observability, and standardized RCA workflows, maintaining **99.95% availability**, reducing MTTR from **90 to 45 minutes**, and reducing repeat incidents by **25%**.
- **Designed and built DHP Agent**, an AI-assisted Kubernetes operations platform using **Python/FastAPI, Azure OpenAI, LangChain, RAG/ChromaDB, Redis, EKS, and Helm**, enabling **100+ users across multiple engineering teams** to accelerate Kubernetes troubleshooting and knowledge retrieval.
- **Strengthened platform security** through **Tenable-based CVE assessment and remediation**, Trivy container image scanning, and Kubernetes RBAC, improving vulnerability visibility and security hardening across the platform.
- **Implemented AWS cost and platform optimization initiatives** including **EBS gp2-to-gp3 migration, RDS Reserved Instances, and Karpenter-based workload optimization**, improving infrastructure efficiency while maintaining platform reliability.
- **Modernized application ingress and edge security** by integrating **Cloudflare WAF and Tunnels** and migrating ingress workloads from **NGINX Ingress to HAProxy**, improving traffic protection and platform consistency.

### Senior Consultant, Deloitte USI (01/2020 – 05/2024)

- Served as **Platform Lead and Infrastructure SME** across 3 workstreams, coordinating **~8 engineers** across capacity planning, production support, release readiness, stakeholder management, and technical delivery while maintaining **99.9% application availability**.
- **Designed resilient AWS architectures** across compute, storage, networking, **IAM, observability, and data services** for enterprise workloads, addressing availability, scalability, security, and cost requirements.
- **Designed and implemented EKS autoscaling** using Kubernetes **Cluster Autoscaler and HPA**, aligning compute capacity with workload demand and improving platform scalability and resource utilization.
- Implemented platform observability using Prometheus, Grafana, and Loki for metrics, dashboards, and centralized log analysis, improving operational visibility and accelerating production troubleshooting.
- **Planned and executed production releases** across client environments, coordinating controlled change windows, release readiness, deployment activities, and rollback procedures while supporting **24x7 operations**.
- **Authored and maintained AWS CloudFormation templates** integrated with **AWS CodePipeline**, enabling repeatable Infrastructure-as-Code delivery and automated infrastructure deployments.
- **Automated multi-account AWS infrastructure provisioning and governance** across **~25 accounts/OUs** using **Terraform and GitHub Actions-based CI/CD**, establishing repeatable infrastructure and governance workflows.

### Senior Systems Engineer, Infosys Ltd (06/2016 – 01/2020)

- **Automated application and infrastructure delivery** using **AWS, Terraform, Python, REST APIs, and Ansible**, reducing manual effort by **60%** and provisioning time from **8 hours to 2 hours**.
- **Provisioned and operated AWS infrastructure** including **ELB, EBS, IAM, CloudWatch, and Auto Scaling** across **20 environments/applications**, improving service resilience and sustaining **99.9% availability**.
- **Developed reusable Ansible roles and playbooks**, reducing configuration variance by **50%** and accelerating environment setup by **65%**.

## Certifications

- **AWS Certified Solutions Architect – Associate**
- **Certified Kubernetes Administrator (CKA)** — In Progress
- **AWS Certified AI Practitioner** — In Progress

## Education

- **Bachelor of Technology (B.Tech.), Computer Science, SRM University 2016** | India
